## **PRODUCT JOURNEY**

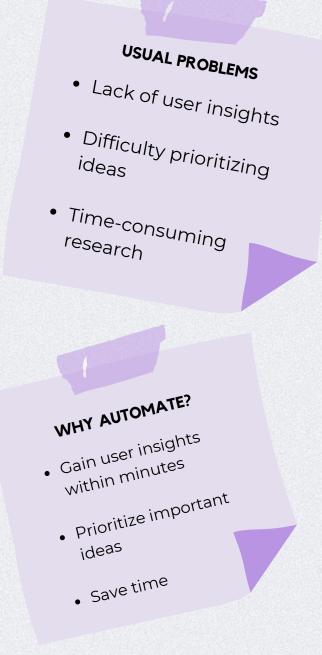

#### THE IDEATION PHASE

#### WHAT IT IS?

- In the ideation phase, product managers brainstorm and generate new product ideas.
- This stage focuses on understanding user needs and pain points, leading to the creation of solutions that effectively address them.
- This phase sets the foundation for successful product development.
- Over the next few pages, you'll find several tools to automate workflows at this stage.

Create Storyboards to Understand User Needs

WORKFLOW

Gain Valuable User Insights in Real-time

Craft User Persona Within Minutes Crafting clear user stories is crucial for understanding user needs, but it can be a time-consuming process.

That's why, writing assistants like User Story Generator **can help by generating initial drafts based on user needs** and functionalities, freeing you to focus on refining and prioritizing them for maximum impact.

Is analyzing large volumes of user interview data and identifying key insights a time-consuming and challenging process?

Rockship's AI-powered user interviews **improve UX design by creating targeted questions** and guiding conversational interviews while delivering real-time insights and swift analysis. It also offers personalized follow-ups to gain valuable user insights.

You can now craft detailed user personas faster and more efficiently!

UserPersona.dev analyzes user data and feedback to aid in creating detailed personas. This **automates data aggregation and interpretation**, providing valuable insights into user behaviors and preferences. By understanding your audience, you can generate product ideas that directly address their needs and pain points. User Story Generator

Rockship

UserPersona.dev

WORKFLOW

Struggling to prioritize feature ideas? Stop the guesswork! **Prioritize** Leverage Aha!'s product road mapping software to score feature Aha! Features & Score ideas by impact and user demand. This data-driven approach aids in Impact creating strategic, high-impact roadmaps. Focus on building the features that will have the greatest impact on your business and your customers. Automate dependency mapping for better project management. But how? Map Monday.com **Dependency and** Monday.com's visual task dependencies provide detailed maps to **Identify Risks** identify potential risks. Proactive observations help address challenges in product development. Want to stay updated with industry news? **Gather Industry** Lexalytics' **News with Text** Adopt Lexalytics' Semantria for automated text analysis and Semantria Analysis industry news gathering. You can use it as a starting point for deeper analysis to stay informed on industry developments.

Experience multi-agent workflow automation with Lyzr

#### WHAT IT IS?

- The second phase of a product manager's project journey involves gathering and analyzing data on competitors, markets, and customers
- This phase is crucial for informed decisionmaking, as it helps identify market opportunities, assess competition, and understand customer preferences, guiding the product development process toward success.
- Give the tools in the next few pages a definite try!

## USUAL PROBLEMS

- Manual data collection can be slow and error-prone
- It can get difficult to keep track of competitor activity

WORKFLOW

Scrapy

Automate Market Data Extraction

Improve Data Quality with Origin Tracking

Skip Manual Data Clean-ups

Knowing and analyzing your competitors is crucial for product success. But we also understand that keeping up with the competition can get overwhelming.

Leverage Scrapy, a web scraping tool, to automate market data extraction from competitor sites and industry publications. This ensures you **gather valuable data quickly and efficiently**.

Tracking data lineage can be complex.

That's why, Informatica Data Catalog manages data lineage, which means tracking the data's origin and transformation. This process **ensures improved data quality and compliance**, enhancing overall data governance practices.

Are manual data clean-ups slowing you down?

Try Alteryz, a simple AI tool that **streamlines data preparation**, enhances efficiency, handles missing data values, and fixes formatting inconsistencies. So, be assured and take the ideation phase forward without a glitch! Data Catalog

Pricefx

Espacenet

WORKFLOW

Want to outshine your next project by getting ahead with competitor insights?

Understand the Industry with Feature Insights

> Analyze Competitor Pricing

Automate Patent & Trademark Search Using Owler Max, you **gain access to comprehensive competitor data**, enabling you to expand your sales prospect list, deepen your understanding of your industry, and gain unparalleled insight into competitors' activities across their business, social media, and more.

Competitor pricing analysis is essential to strategically position a product in the market, ensuring competitive pricing while maximizing profitability and market share. But if you're struggling to analyze competitor pricing strategies, we got you!

Pricefx provides insights for strategic pricing decisions, aiding product managers in **identifying opportunities for adjustments**.

Why waste time tracking competitor patents and trademarks when you can be building the next top product in the market?

Let Espacenet help you **get access to a vast patent database** for competitor filings. By combining it with alert tools to enhance monitoring, you can identify potential intellectual property risks.

Lyzr offers multiple deployment stratergies

WORKFLOW

Tracking consumer search trends can reveal great opportunities.
But how to make tracking them efficient?
Exploding Topics monitors search trends related to your industry and competitor keywords. Analyze trends to identify shifts in

and competitor keywords. Analyze trends to **identify shifts in consumer interest**, but further research may be needed to validate opportunities.

With the right tools, you won't have to divide your attention between product building and monitoring competitor websites.

Utilize ChangeTower for **automatic tracking of changes on competitor websites**. While product managers must interpret changes, this tool helps keep you informed of trends and updates.

Difficulty analyzing competitor app reviews?

Use Data.ai to streamline competitor app review **analysis for user feedback and feature requests**. Human reviews are essential, but the tool provides competitive intelligence for product improvements. Exploding Topics
